

# **BOLD** *by* **NATURE** *Mega/Méga*

Our Mega line is crafted with Bold blends in mind. Every recipe is made with locally prepared ground meat, triple ground bone organ meats and fresh vegetables. With a medley of options to meet the unique needs of your fluffier half, serve up Mega flavour and value.

# Mega flavour, Bold in Nature.

## Serve Bold by Nature Mega.

Our Bold by Nature Mega line offers over 15 locally prepared raw recipes. Each meal is made of farm-fresh ground meat, triple ground bone and organ meats, a fresh vegetable medley, and kelp. Easy to thaw and even easier to enjoy, it's an affordable raw solution for big dogs and multi-dog households.

## Why raw?

Feeding your pet a raw diet is not only beneficial, but also extremely palatable. Bold by Nature's raw recipes are hand-crafted to mimic a natural prey diet; everything your dog would have eaten in the wild is found in our meals. By feeding a raw diet, you may notice some beneficial changes in your pet, including smaller poops, shinier coats, cleaner teeth and licked-clean bowls.

Within our Mega line we also offer base blends and variety packs that provide mega benefits.

## Base Blends.

Our Base Blend recipes are crafted with the same farm-fresh organs, ground meat and triple ground bones in our signature Mega blends, removing the vegetables and kelp. Complete and clean. Our base blends allow you to customize your dog's bowl to their liking and individual preferences. Add your own tripe, vegetables and supplements for a drool worthy meal.

## The Packs.

We offer three flavour-forward variety packs to help promote healthy protein rotation in your dog's diet. Our Packs are also a great option for multi-dog households.

⚡ Improved cognitive function

🦷 Cleaner teeth

💎 Shinier coat

🩺 Healthier skin

💩 Smaller stools

## Our facility.

We produce over a million patties per month in our 24,000 square-foot, state of the art facility. We use a nitrogen driven, cryogenic freeze tunnel technology that allows us to freeze patties in five minutes, making sure our patties stay fresh and exceed safety guidelines.

Before being shipped out in temperature-controlled trucks, every patty passes a quality inspection, so you know your pet is being served the highest quality of meals.

## How to Serve.

---

Keep food frozen. When ready, thaw the necessary portion in the fridge. Patties will thaw in 12 hours (approximately).

---

Store all unused portions in the fridge. Raw food should be used within 4 days.

---

Handle all raw meat with appropriate care and hygiene. Wash all surfaces, bowls and utensils with hot, soapy water.

---

Not for human consumption.  
Do not cook. Contains ground bone.

## This is Bold by Nature.

Since 2005 we've been committed to providing pets with healthy, raw food. All of our recipes are crafted with unprocessed ingredients and prepared locally, making us one of the leading raw pet food brands in Canada. Bold claim, all true.
