

# **BOLD** *by* **NATURE** *Select / Sélect*

Our original recipe provides blends made with our signature natural green beef tripe from pasture-raised cows, ground meat, triple ground bone and organ meats. Real flavour is served.

# Locally prepared, proudly served.

## Serve Bold by Nature Select.

Our Select line offers our original recipe, freshly formulated with pasture-raised green beef tripe, ground meat, triple ground bone and organ meats. Specially designed to provide a gluten, sugar and carbohydrate free raw option, our Select blends contain no fruits or veggies, which is great for pets with dietary restrictions or issues.

## Select variety with our premium Butcher's Box packs.

Our Butcher's Box offers 12 lbs of premium raw food with a mix of proteins in every box. With three options to choose from, it makes rotating your proteins and boosting your pet's vitality easier and more flavourful.

## What are the benefits of tripe?

Plain and simple, tripe is the stomach of the cow. Along with many other health benefits, tripe is full of beneficial probiotics and enzymes that aid in digestion for your pets. Adding tripe to your pet's diet allows them to digest meals with less energy, absorb more nutrients and support the digestive system as a whole. Beyond health benefits, tripe is an appetite stimulator – a great additive for picky pups.

## Why raw?

Feeding your pet a raw diet is not only beneficial, but also extremely palatable. Bold by Nature's raw recipes are hand-crafted to mimic a natural prey diet; everything your dog would have eaten in the wild is found in our meals. By feeding a raw diet, you may notice some beneficial changes in your pet, including smaller poops, shinier coats, cleaner teeth and licked-clean bowls.

## Our facility.

We produce over a million patties per month in our 24,000 square-foot, state of the art facility. We use a nitrogen driven, cryogenic freeze tunnel technology that allows us to freeze patties in five minutes, making sure our patties stay fresh and exceed safety guidelines.

Before being shipped out in temperature-controlled trucks, every patty passes a quality inspection, so you know your pet is being served the highest quality of meals.

Improved cognitive function

Cleaner teeth

Shinier coat

Healthier skin

Smaller stools

## How to Serve.

---

Keep food frozen. When ready, thaw the necessary portion in the fridge. Patties will thaw in 12 hours (approximately).

---

Store all unused portions in the fridge. Raw food should be used within 4 days.

---

Handle all raw meat with appropriate care and hygiene. Wash all surfaces, bowls and utensils with hot, soapy water.

---

Not for human consumption.  
Do not cook. Contains ground bone.

## This is Bold by Nature.

Since 2005 we've been committed to providing pets with healthy, raw food. All of our recipes are crafted with unprocessed ingredients and prepared locally, making us one of the leading raw pet food brands in Canada. Bold claim, all true.
